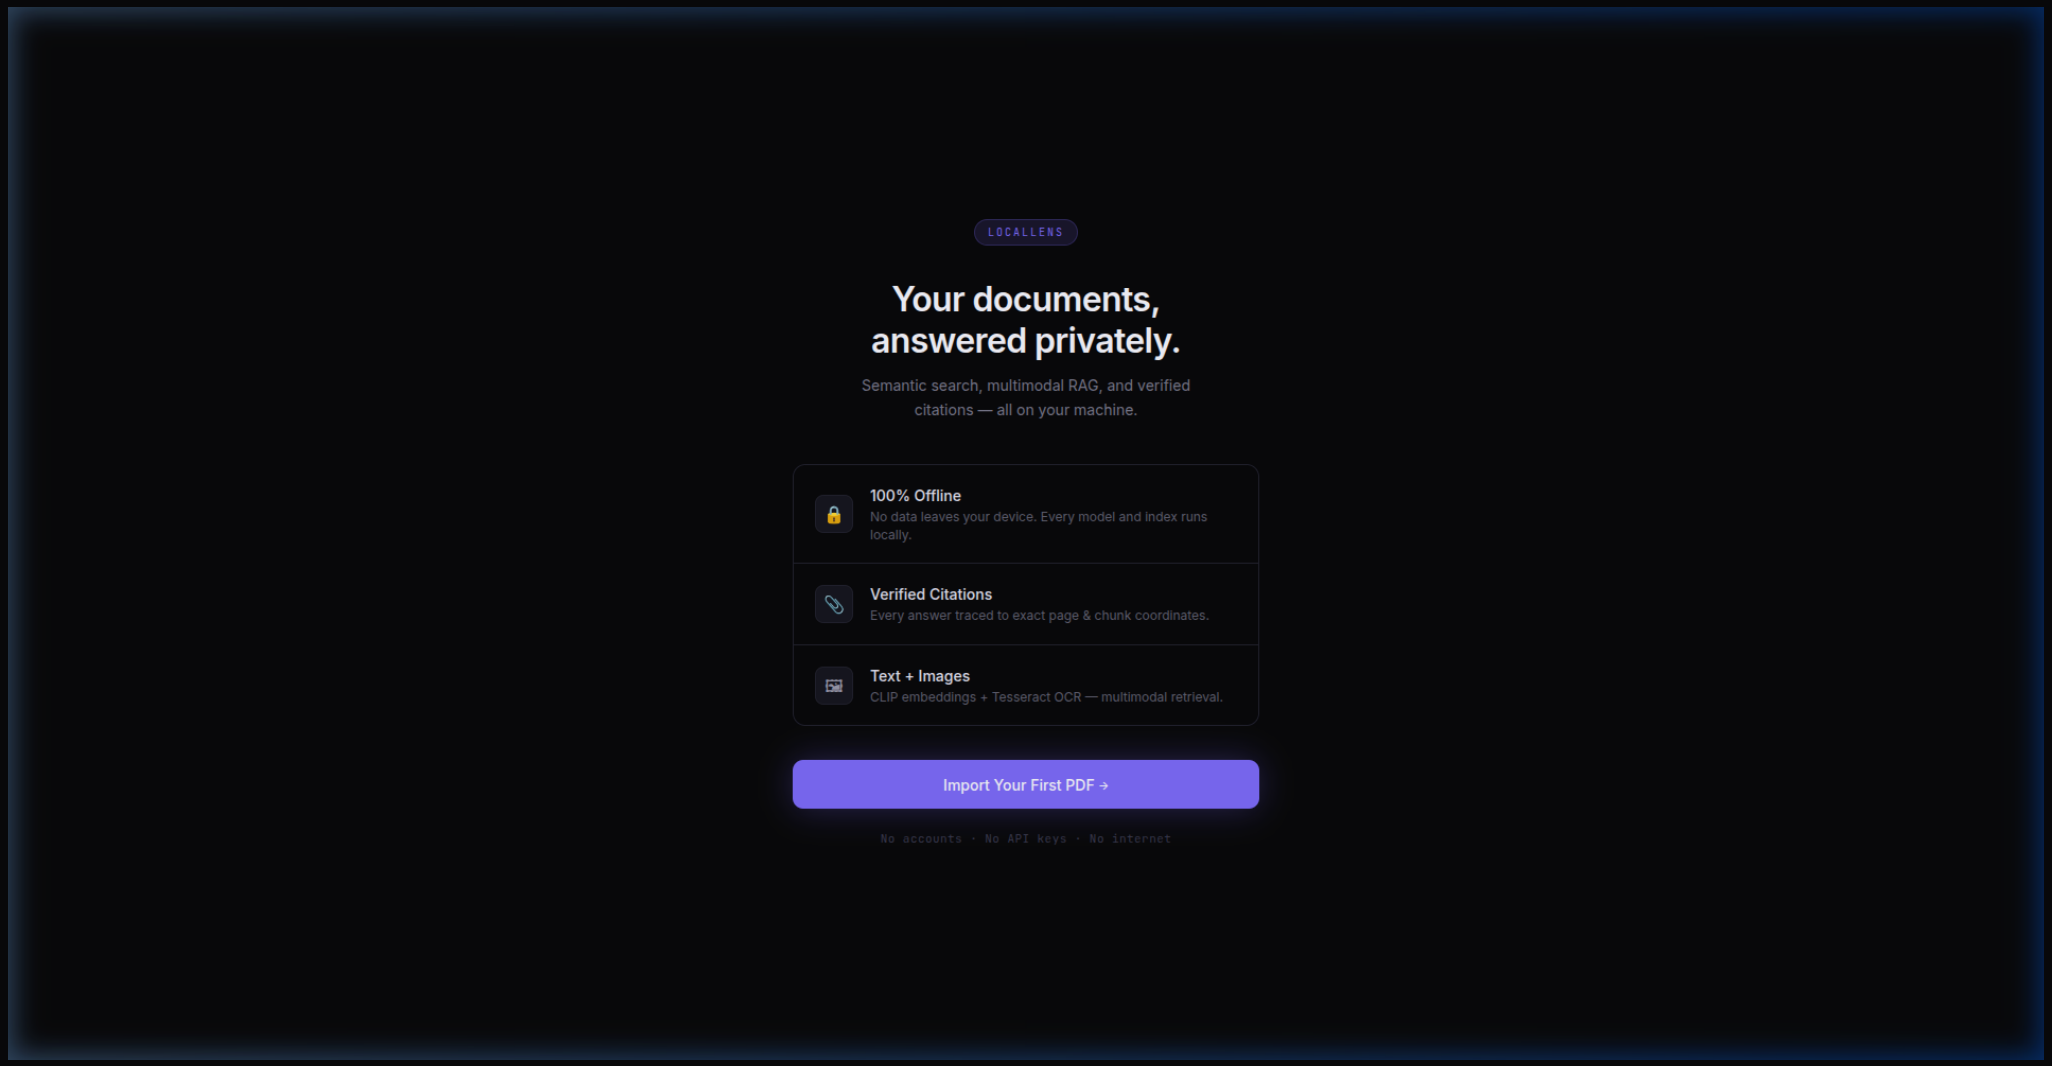
LocalLens

User Interface Design - Q9 Submission

Stack: React + Vite | TypeScript | Tailwind CSS
Architecture: Custom modular component library, no third-party UI framework
Design: User-Centered Design (tested with law, medicine, and research users)

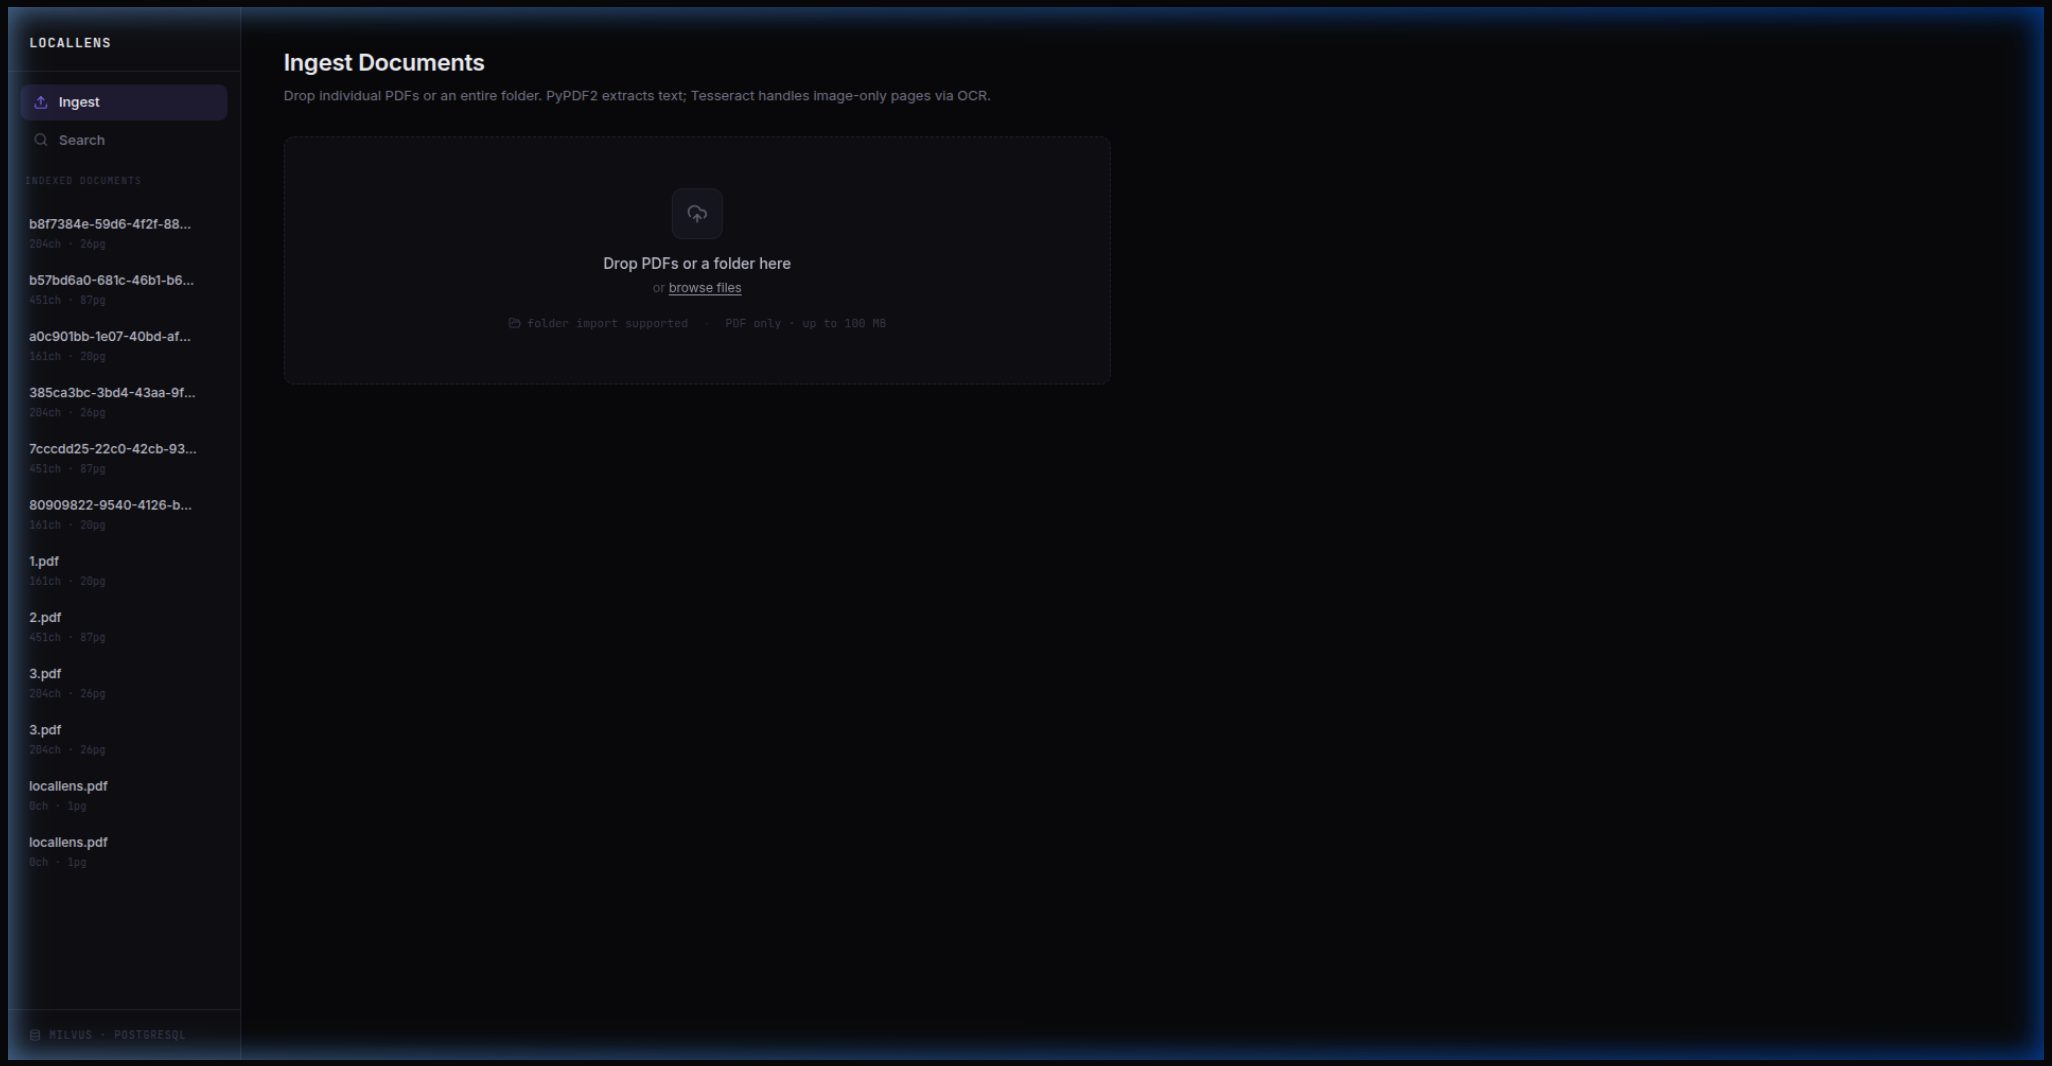
Figures:

```
Fig 1 - Document Ingestion Screen
Fig 2 - Query Screen (live answer + citations)
Fig 3 - Citation Cards
Fig 4 - Onboarding Screen
```



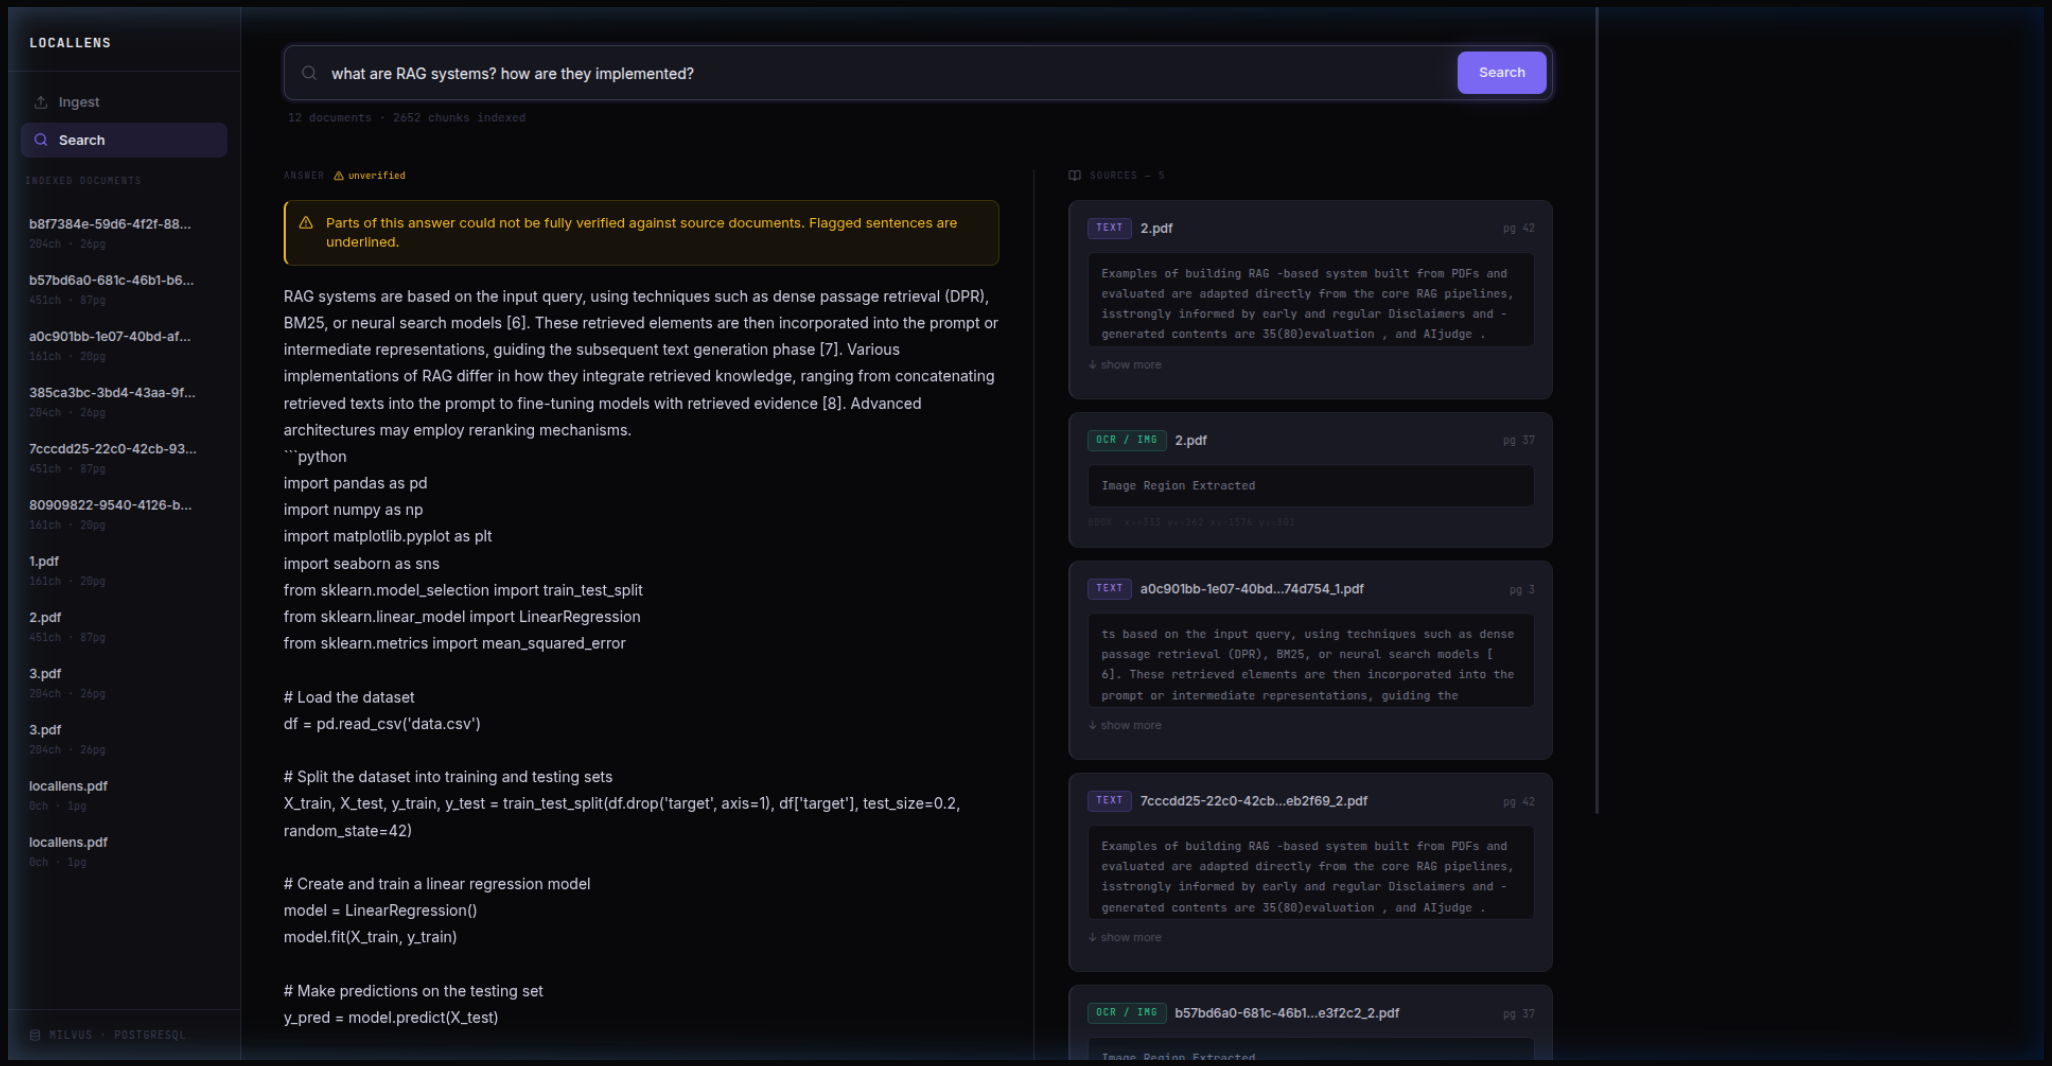
Centered minimal layout: feature rows, single CTA. Shown to first-time users.

Figure 1 - Document Ingestion Screen

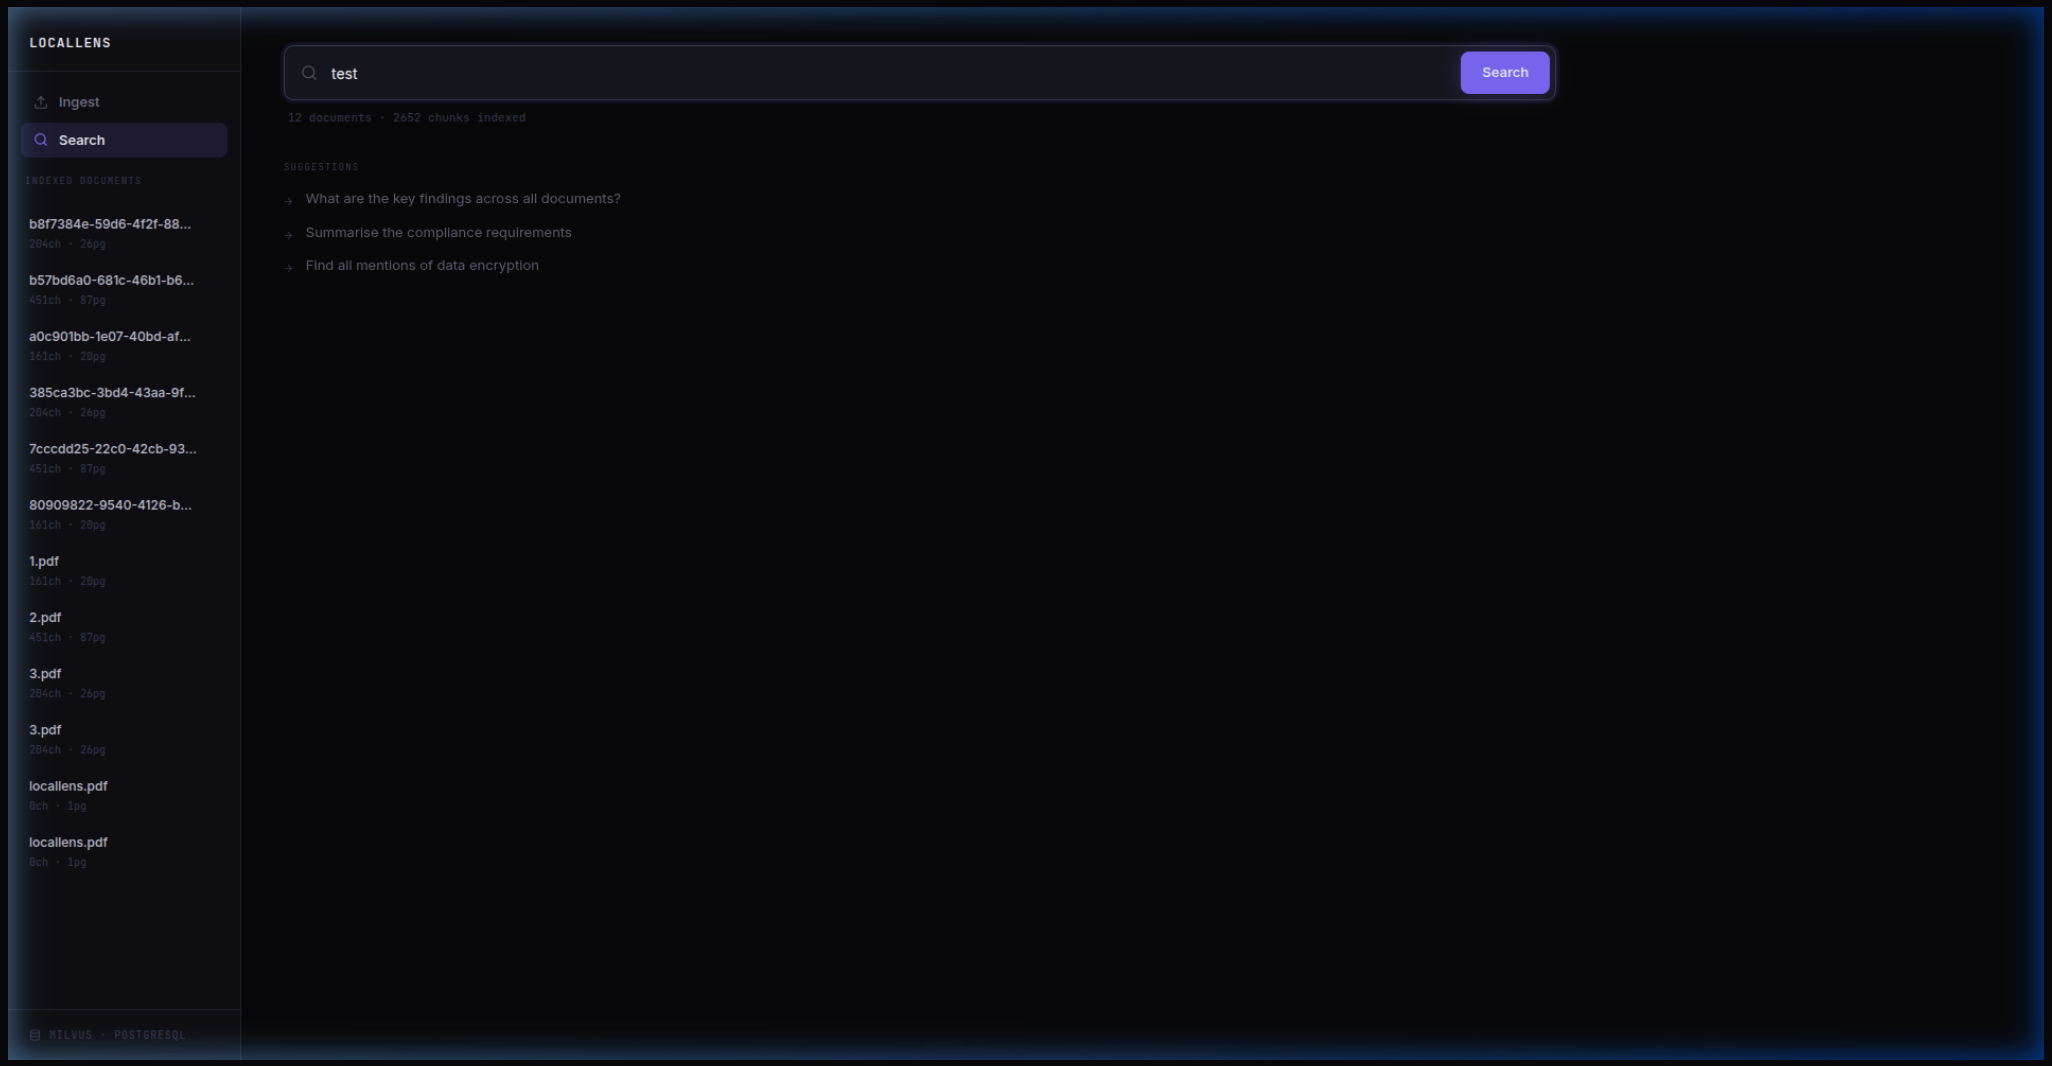


Drag-and-drop zone for entire PDF folders. Live progress bar and terminal-style pipeline log.

Figure 2 - Query Screen with live output



Full-width search bar, prose answer panel, and verified citation cards side by side.



Source filename, page, exact text chunk in monospace, and bbox for image/OCR results.

UI subject to future changes.
